Dear Mr Fasolino

LICENCE MONITORING PLAN – CORIO FACILITY

Thank you for meeting with me on 2 July 2007 to discuss the monitoring program required by licence EW214 issued to Terminals Pty Ltd Corio facility.

The monitoring program you forwarded via email on 3 July 2007 is approved. The annual report required by condition 2.2 to be submitted by 30 September each year should contain the results of all testing done in accordance with the now approved monitoring program. This program may be amended by EPA or by Terminals submitting a revised monitoring program which is subsequently approved in writing by EPA.

I also note your letter of 14 June 2007 where you submitted a *Report on Measures Taken to Ensure Butadiene is Hot Degassed* in accordance with condition 2.1 of the licence.

If you need additional information or assistance, please contact Neil McKenzie on (03) 5226 4825.

Yours sincerely

COLIN MCINTOSH
MANAGER SOUTH WEST
